

When the cap (134) is completely inserted or fully engaged in the housing (132), the lip (135) sealingly engages the housing (132).

On page 25, lines 1-17, kindly delete the Abstract of the Disclosure and add a new abstract as follows:

Abstract of the Disclosure

A card includes in a radio transceiver that communicates in first and second frequency bands. First and second antennas are in the card and are coupled to the radio transceiver. A microprocessor in the card selects one of the first and second antennas.
